Submission deadline

Friday 25 September at 23:59

Week	In your timetabled session	Before the next session
Weeks 2–3 10–23 August	• Form your group: Join a Report 1 research group in Canvas. • All group members must be in the same practical.	• Choose a direction: Review projects. • Make sure all group members are in the correct Canvas group.
Week 4 24–30 August	• Plan and pilot: Develop a hypothesis and predictions. • Design the main experiment, sketch the expected graph, and identify analysis. • Draft data sheets and equipment needs; plan the pilot and collect equipment.	• Run the pilot: Complete it before Week 5. • Everyone contributes; begin literature and report notes.
Week 5 31 August–6 September	• Refine and run: Discuss what the pilot revealed and finalise the design. • Confirm response and explanatory variables and the analysis; collect remaining equipment.	• Run the main experiment: Collect data as a group. • Maintain one shared workbook with metadata and clean data sheets.
Week 6 7–13 September	• Use the period for project work • There is no structured practical activity. • Complete project work, troubleshoot, and organise the group dataset.	• Finish data collection: Complete the experiment and collate before Week 7.
Week 7 14–20 September	• Analyse and interpret: Spend no more than 30 minutes finalising the dataset. • Individually plot, analyse, and interpret in R or SPSS; choose figures and statistics.	• Begin the report: Finish analyses and graphs. • Draft Introduction, Methods, and Results; use report instructions and rubric.
Week 8 21–27 September	• Finalise submission: Use writing guidance and finalise analyses, statistical output, and figures. • Prepare the group workbook with metadata, clean data, and supporting worksheets. • Each student completes their own report.	• Submit both components • One group member submits the group data file. • Every student submits their individual report. • Friday 25 September at 23:59.
